

REPORT OF YOUTH SENSITISATION THROUGH SOCIAL ACTION

Understanding Social Issues and the Role of Visual Communication in an NGO

Submitted To:

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of **B.Tech CSE**

By

Name of Student: SAGAR SINGH

Roll Number of Student: 25SCS1003001267

Batch: 2025-29

Internship Organisation: RELIEF MISSION FOUNDATION

Mode of Internship: VIRTUAL

Internship Period: 01 AUGUST 2026 – 01 SEPTEMBER 2026

CANDIDATE'S DECLARATION

I, SAGAR SINGH, do hereby declare that the internship report titled **“Youth Sensitisation through Social Action: Understanding Social Issues and the Role of Visual Communication in an NGO”** has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering. The report is based on my learning, research, and remote participation during my virtual Graphic Design internship with Relief Mission Foundation from 01 August 2026 to 01 September 2026. All supporting documents supplied for the internship have been appropriately incorporated as annexures.

I further declare that the observations, learning outcomes, and descriptions of my role in this report represent the genuine internship work and creative contributions documented for the project. I have not represented physical field visits or direct community measurements where such activities were not part of the virtual graphic design internship. All references and supplied organizational documents used in preparing this report have been acknowledged.

I affirm that this report has not been submitted to any other institute for any degree or diploma requirement, and I shall be solely responsible for any copyright violation arising from material used in this report.

Student Name: SAGAR SINGH

Roll No.: 25SCS1003001267

ACKNOWLEDGEMENT

I sincerely thank Relief Mission Foundation for providing me with the opportunity to undertake a 30-day virtual Graphic Design internship under its Youth Sensitising Initiative. The internship gave me an invaluable platform to analyze pressing social issues, understand the functional framework of non-governmental organizations, and connect analytical thinking with practical visual design challenges. Working hands-on with typography, grid layouts, color palettes, and digital storytelling was an enriching creative experience.

I am deeply grateful to the organisation's Founder and Secretary, Seema Yadav, as well as the entire team at Relief Mission Foundation for their constant guidance, constructive feedback, and encouragement during the internship. The virtual format demanded disciplined independent execution, structured digital communication, and prompt delivery of design assets, demonstrating how impactful social sensitisation can be achieved remotely through visual media.

I would also like to express my sincere gratitude to the faculty and internship coordinators at the School of Computer Science and Engineering, IILM University, Greater Noida, for facilitating this opportunity to broaden my creative and technical horizons beyond core curricula. I extend my heartiest thanks to my parents for their continuous support and guidance throughout the tenure of this internship and the preparation of this report.

Finally, I am thankful for this reflective experience. It has reinforced the importance of visual empathy, social responsibility, structured design strategy, and technology-assisted problem-solving in addressing human-centric challenges.

4. PROJECT DESCRIPTION

4.1 Introduction

As an undergraduate Computer Science student at IILM University, my engagement with Relief Mission Foundation offered a unique vantage point to explore how technological paradigms, digital design tools, and social action intersect. The primary objective of this internship was to sensitise young professionals to ground-level social issues by actively working as a Graphic Designer to communicate these challenges to a broader digital audience.

Rather than restricting internship experiences to traditional administrative tasks, this initiative framed social learning as a structured, creative process. It challenged me to take complex social inequities—such as medical emergencies, homelessness, educational gaps, and environmental degradation—and translate them into visually appealing, meaningful, and audience-focused digital campaigns. Because the internship was conducted in a virtual format, the methodology focused heavily on digital communication, visual design, social media strategy, and reflective evaluation.

The virtual nature of the engagement emphasized self-driven creativity and independent problem-solving. It demonstrated that social sensitisation does not rely solely on physical presence, but also on the capacity to critically analyze information, structure meaningful visual interventions, and communicate insights effectively. Consequently, the program acted as an intellectual bridge, enabling an engineering student to translate structured problem-solving and software proficiencies into the domain of social development and human welfare.

4.2 Organization Profile

Relief Mission Foundation is a non-governmental organisation dedicated to community welfare, awareness generation, and social development. Official communications confirm that Relief Mission Foundation is operating from its registered office at C/o Manoj Aggarwal, behind Shekhawat Nursing, ward no. 15, Moh. Bachhadi, Kotputli, Jaipur, Rajasthan, India, 303108.

According to the official internship offer letter, Relief Mission Foundation inducted me into its 30-day Youth Sensitising Initiative starting from 01 August 2026 through 01 September 2026. The engagement was explicitly designated as a virtual, unpaid learning internship to be completed remotely as a Graphic Designer.

Throughout this project, Relief Mission Foundation was studied as a dynamic case model of non-profit operations. The analysis focused on how an NGO bridges the gap between public policy, grassroots needs, and community participation through structured digital awareness drives, strategic visual interventions, and social advocacy across platforms like Instagram, Facebook, and LinkedIn.

4.3 Problem Statement

Students pursuing technical disciplines such as Computer Science often possess strong analytical and technical skills, yet they may lack direct insight into complex social realities. Simultaneously, NGOs conducting critical work on the ground frequently struggle to communicate the urgency of their initiatives to the wider public. Complex issues are often presented through dense text or unorganized data, leading to low engagement among digital-native audiences.

The central problem addressed by this project is the disconnect between the critical on-ground work of NGOs and the digital awareness required to drive support. Identifying a societal flaw is merely diagnostic; constructing a viable digital intervention requires systematic research, audience analysis, strict brand compliance, and impactful graphic design.

Conducting this evaluation in a virtual environment added an additional dimension: utilizing design tools like Canva and Adobe to systematically engineer media content that converts passive online scrollers into active advocates and supporters, without losing the emotional integrity of the core message.

4.4 Project Objectives

- To sensitise engineering students to real-world social problems and community challenges through visual media.
- To bridge the gap between academic/technical software proficiency and social sector advocacy.
- To design audience-focused, meaningful, and aesthetically compelling visual assets for digital and social media campaigns.
- To apply industry-standard design tools (Canva, Adobe) to create digital campaign graphics, simple infographics, and professional document layouts.
- To maintain strict adherence to the NGO's official brand guidelines, ensuring uniform logos, fonts, and colors across all materials.

- To foster empathetic, human-centric design thinking when conceptualizing community interventions.
- To cultivate independent creative discipline, remote workflow management, and clear digital communication practices.

4.5 Scope of the Project

The project scope encompassed a multi-disciplinary study of digital communication frameworks and NGO outreach strategies. The core thematic domains explored for content creation include:

1. **Youth Empowerment & Skill Building:** Promoting leadership and digital literacy through dynamic, engaging social media posts.
2. **Educational Access & Awareness:** Designing awareness graphics focused on bridging educational gaps for underprivileged groups.
3. **Gender Equity & Social Justice:** Creating visual narratives highlighting advocacy frameworks for women empowerment and equal opportunity.
4. **Community Health & Hygiene:** Structuring clean, easily readable infographics and charts for public health awareness and medical emergencies.
5. **Environmental Sustainability:** Conceptualizing visual content advocating for tree plantation, waste management, and urban greening.
6. **Animal Welfare:** Designing empathetic campaigns to encourage the care and rescue of street animals.

From an organizational perspective, the scope involved evaluating how an NGO formulates campaign goals, engages digital channels, and maintains visual consistency. The work remained entirely within the virtual paradigm, focusing on content strategy and graphic design without alleging unverified physical field activities.

4.6 Technologies and Tools Used

While the internship was rooted in social action, executing the graphic design tasks remotely required leveraging specific digital tools and software technologies:

- **Graphic Design Software:** Canva, Adobe Photoshop, and Adobe Illustrator for conceptualizing social media awareness flyers, simple infographics, and digital outreach content.

- **Document & Layout Processing:** Microsoft Word / Google Docs for formatting professional brochures, annual reports, factsheets, and newsletters.
- **Digital Communication & Collaboration:** Zoom, Google Meet, and email channels for virtual meetings, receiving campaign briefs, and feedback sessions.
- **Social Media Platforms:** Instagram, Facebook, and LinkedIn for analyzing audience engagement and tailoring graphic dimensions and creative styles.

4.7 Project Workflow / System Architecture

Because this project centers on digital intervention and visual communication, the architecture is defined through a **Creative Intervention & Virtual Workflow**:

[Campaign Brief / Social Cause Identification] → [Audience & Visual Research]

[Final Publishing / Archiving] ← [Review & Feedback Iteration] ← [Graphic Design & Production]

1. **Brief Acquisition:** Receiving campaign requirements and understanding the specific social issue to be highlighted.
2. **Brand Alignment:** Reviewing the NGO's brand guidelines to ensure color, font, and layout uniformity.
3. **Visual Ideation:** Conceptualizing how to turn dense text or data into engaging digital flyers or infographics.
4. **Drafting:** Creating the initial designs for daily posts, stories, or brochures using Canva or Adobe tools.
5. **Review & Iteration:** Submitting drafts for review and making rapid adjustments based on team feedback.
6. **Final Delivery:** Formatting and delivering high-quality, professional assets ready for deployment across digital platforms.

4.8 Methodology

The study adopted a structured **Design Thinking–Social Intervention** methodology divided into sequential phases:

- **Phase 1: Empathize & Understand:** Analyzing the specific social challenges and defining the emotional tone required for the campaign messaging.
- **Phase 2: Define the Visual Identity:** Distilling complex information and ensuring it aligns with Relief Mission Foundation's established brand identity.

- **Phase 3: Visual Conceptualization:** Utilizing creative elements to make youth-centric posts more relatable. This included incorporating custom digital calligraphy for impactful campaign headings and applying subtle, doodle-style overlay graphics to break up formal text and boost engagement.
- **Phase 4: Photo Processing & Layout:** Employing warm, Ghibli-inspired color grading techniques on campaign photos to evoke deeper empathy and visual storytelling, while assembling structured grid layouts in Canva/Adobe.
- **Phase 5: Virtual Interaction & Feedback:** Engaging in remote communication with team leads to evaluate the effectiveness of the creative drafts.
- **Phase 6: Refine & Standardize:** Refining typography alignment, ensuring logo placement is consistent, and converting data into simple charts.
- **Phase 7: Synthesis & Documentation:** Aggregating final design assets, organizing digital files, and preparing analytical briefs on the design process.

4.9 Virtual Internship Implementation

The internship was formally executed under a virtual operational model, as stipulated in the official appointment letter. Remote execution required establishing an independent workflow to ensure task completion, design accuracy, and continuous alignment with organizational objectives.

Key elements of the virtual implementation included:

- **Self-Managed Execution:** Establishing daily work schedules to meet deadlines for social media posts, stories, reels, and digital campaign graphics.
- **Asynchronous Communication:** Utilizing digital messaging and email channels for receiving daily briefs, submitting deliverables, and requesting feedback.
- **Digital Asset Organization:** Maintaining structured digital repositories of brand assets, completed graphics, and draft documents to ensure seamless remote collaboration.
- **Iterative Remote Design:** Adapting traditional graphic design workflows to rely entirely on online feedback loops and cloud-based design software.

4.10 Activities and Work Performed Virtually

During the 30-day tenure, specific tasks executed included:

1. **Social Media Design:** Designed daily posts, interactive stories, reels, and digital campaign graphics optimized specifically for platforms like Instagram, Facebook, and LinkedIn.
2. **Infographic Creation:** Created simple infographics and charts to turn complex social data (such as healthcare access statistics or poverty metrics) into easy-to-understand visual images.
3. **Brand Consistency Management:** Ensured all online and offline materials strictly followed the NGO's brand guidelines regarding logos, fonts, and colors to maintain professional uniformity.
4. **Document Formatting:** Formatted and designed layouts for organizational literature, including annual reports, brochures, factsheets, and newsletters, ensuring they looked neat and highly professional.
5. **Campaign Visualization:** Conceptualized digital campaign outlines and visual communication materials to support specific fundraising events, leveraging customized aesthetic choices to maximize audience retention.

4.11 Areas of Social Issues Covered

4.11.1 Youth Empowerment & Leadership

Explored the need for constructive youth engagement by designing dynamic, energetic social media visuals that promote digital literacy and community volunteering.

4.11.2 Educational Inclusion & Digital Literacy

Created compelling infographics depicting socioeconomic disparities in education, aimed at bridging knowledge gaps and generating support for community tutoring initiatives.

4.11.3 Women Empowerment & Equal Opportunity

Engineered graphics illustrating vocational skill-building programs and advocacy frameworks for women, highlighting economic independence and dignity.

4.11.4 Community Health & Medical Relief

Developed clean, information-driven flyers and banners for public health awareness, rural sanitation, and urgent medical emergency appeals for vulnerable populations.

4.11.5 Environmental Conservation & Social Responsibility

Designed campaigns around waste management, urban greening, and sustainable resource use, utilizing natural color palettes to encourage eco-friendly community habits.

4.11.6 Animal Welfare

Crafted engaging social media posts to promote awareness and compassion for street animals, encouraging the community to adopt and protect them.

4.12 My Role as an Intern

As a virtual Graphic Design Intern, my primary responsibilities combined technical software skills with creative social advocacy:

- **Adaptability & Iteration:** Demonstrating a strong willingness to accept feedback from team leads and making quick, iterative changes to designs.
- **Design Execution:** Utilizing basic-to-good knowledge of tools like Canva, Adobe Photoshop, and Adobe Illustrator to create high-quality digital assets.
- **Brand Adherence:** Strictly following the NGO's brand guidelines to keep logos, fonts, and colors uniform across all online and offline materials.
- **Data Visualization:** Creating simple infographics and charts to turn complex social data or research into easy-to-understand visual images.
- **Professional Formatting:** Formatting annual reports, brochures, factsheets, and newsletters so they appeared neat and professional.
- **Content Generation:** Designing daily posts, stories, reels, and digital campaign graphics tailored for platforms like Instagram, Facebook, and LinkedIn.

4.13 Expected Outcomes

- Enhanced understanding of how visual communication drives engagement in grassroots social dynamics and NGO operational frameworks.

- Ability to apply graphic design principles (using Canva and Adobe) to non-technical, human-centric challenges.
- Development of concise, technical, and social content design capabilities, resulting in a robust digital portfolio.
- Improved self-reliance, remote workflow management, and digital collaboration discipline.
- Formation of a solution-oriented mindset regarding how technology and digital art can amplify civic duties and community development.

4.14 Learning Outcomes

This internship fundamentally broadened my perspective on the intersection of technology, design, and the social sector:

1. **Visualizing the Human Element:** Data provides scale, but empathetic graphic design is what connects the public to the true human reality of social needs.
2. **Strategic Brand Intervention:** Effective NGO work requires meticulous visual planning and consistency; brand guidelines are vital for establishing trust and long-term sustainability rather than ad-hoc relief.
3. **Role of Technology in Social Action:** Modern design tools and digital platforms play a crucial, foundational role in amplifying social initiatives and scaling awareness globally.
4. **Agility and Iteration:** I learned the importance of leaving ego behind in the design process, rapidly adapting to feedback from team leads to best serve the campaign's goals.
5. **Individual Responsibility:** Technical and creative knowledge carries a responsibility to contribute positively to social development and community welfare.

4.15 Challenges and Observations

- **Translating Emotion to Digital Formats:** Balancing the emotional weight of complex social data with clean, professional graphic design required filtering bias and focusing on verified structural causes.
- **Remote Engagement Constraints:** Overcoming the absence of direct, in-person brainstorming sessions by relying heavily on detailed messaging, iterative digital drafting, and remote case studies.

- **Balancing NGO Objectives with Resource Constraints:** Observing how non-profit organizations must continuously optimize limited digital real estate (like social media grids) to convey a massive amount of information while maintaining high community impact.
- **Need for Digital Transformation:** Recognizing significant opportunities for computer science techniques—such as data analytics, automated documentation, and advanced visual media—to streamline NGO workflows.

4.16 Recommendations

1. **Structured Social Innovation Modules:** Technical universities should integrate structured social-impact projects where engineering students apply UI/UX and graphic design principles to real-world NGO challenges.
2. **Standardized Digital Portfolios for Remote Internships:** Virtual internships should incorporate standardized digital task trackers, cloud-based asset repositories, and periodic video presentation milestones to make remote collaboration seamless.
3. **Standardized Template Libraries:** NGOs should invest in building robust, pre-approved Canva template libraries for recurring campaigns to speed up the drafting process and maintain visual consistency for future interns.

4.17 Conclusion

The virtual Graphic Design internship with Relief Mission Foundation under its Youth Sensitising Initiative provided a vital learning experience. It bridged the gap between my academic technical background in Computer Science and the practical, creative realities of the social development sector.

Through structured digital design, campaign conceptualization, and analytical reflection, I gained deep insights into how social problems originate and how non-governmental organizations communicate targeted interventions. I learned how young professionals can leverage software tools like Canva and Adobe to foster positive social change. The experience reinforced that technical and creative expertise, when combined with empathy and visual strategy, can serve as a powerful catalyst for community upliftment.

4.18 Certificates and Communication Proof

In compliance with IILM University guidelines, the official internship communication records, including the Internship Offer Letter (dated 10 August 2026) and the official Internship Completion Certificate issued by Relief Mission Foundation (confirming tenure

from 01 August 2026 to 01 September 2026), have been verified and attached in Annexures A and B respectively.
